

**CONDITION
ZEBRA™**

Fully managed, human-led services for **Microsoft 365** **Defender**

- Open architecture-based MDR Platform
- Leverages existing endpoint/firewall investments
- AI/ML accelerated human-led threat hunting
- Hands-on keyboard-based incident response

**Microsoft
Defender**

All the Microsoft 365 components

Microsoft Defender for Office

Microsoft Defender for Identity

Microsoft Defender for Cloud Apps

Microsoft Defender for Endpoints

Exclusive Benefits

Detection rules optimization

We tailor your M365D solution to work the best for your organizational environment through detection rules and policy optimization as per the latest TTPs in the MITRE ATT&CK framework.

Automated, quick, and precise threat response

Our platform leverages AI and ML for automatic threat response and false positives elimination. Experts provide step-by-step guidance in triage, assisting them with more precise responses.

Round-the-clock security

We have a team of MS-certified analysts who engage in round-the-clock security support with quick and accurate decision-making and continuous threat hunting.

Compliance management

End-to-end compliance achievement through round-the-clock log collection, file integrity monitoring, and vulnerability management.

Automated action against phishing, suspicious activity

We tailor the platform to block suspicious attempts of sign-in and automatically take action against suspicious activity.

Threat Lab and IOC management

We have a dedicated team of analysts who manage threat detections and IOCs. We also have threat hunters and researchers who conduct research and report on the latest TTPs deployed by attackers from time to time.
